

Publikationen

Michel (Stand November 2022)

* kennzeichnen geteilte Erst- oder Letztautorenschaften

Kayhan Wagner, E., Nguyen, T., Matthes, D., Langeloh, M., Michel, C., Jiang, J., & Hoehl, S. (2022). Interpersonal neural synchrony when predicting others' actions during a game of rock-paper-scissors. *Scientific Reports*, 12, 12967 (2022).

<https://doi.org/10.1038/s41598-022-16956-z>

Michel C, Pauen S, Hoehl S. (2022). When it pays off to take a look: Infants learn to follow an object's motion with their gaze—Especially if it features eyes. *Infancy* 27(3):515-532.

doi: 10.1111/infa.12464.

Kayhan Wagner, E., Matthes, D., Michel, C., Langeloh, M., Banki, A., Mariott, I., Wass, S., & Hoehl, S. (2022). DEEP: A dual-EEG pipeline for adult and infant hyperscanning studies.

Developmental Cognitive Neuroscience, 54. 10.1016/j.dcn.2022.101104

Menn, K. H.*, Michel, C.*, Meyer, L., Hoehl, S., & Männel, C. (2022). Natural Infant-Directed Speech Facilitates Neural Tracking of Prosody. *NeuroImage*, 251, 118991. Advance online publication. <https://doi.org/10.1016/j.neuroimage.2022.118991>

Thiele, M., Hepach, R., Michel, C.*, & Haun, D. B. M.* (2021). Observing others' joint attention increases 9-month-old infants' object encoding. *Developmental Psychology*, 57(6), 837-850. <https://doi.org/10.1037/dev0001189>

Köster M, Langeloh M, Michel C, Hoehl S. (2021). Young infants process prediction errors at the theta rhythm. *Neuroimage*. doi: 10.1016/j.neuroimage.2021.118074.

Thiele, M., Hepach, R., Michel, C. and Haun, D. (2021), Infants' Preference for Social Interactions Increases from 7 to 13 Months of Age. *Child Development*, 92, 2577-2594. <https://doi.org/10.1111/cdev.13636>

Köster, M., Langeloh, M., Michel, C., & Hoehl, S. (2021). Young infants process prediction errors at the theta rhythm. *NeuroImage*, 236, 118074. <https://doi.org/10.1016/j.neuroimage.2021.118074>

Thiele, M., Hepach, R., Michel, C., Gredebäck, G., & Haun, D. B. M. (2021). Social interaction targets enhance 13-month-old infants' associative learning. *Infancy*, 26(3), 409-422. <https://doi.org/10.1111/infa.12393>

Michel, C., Kayhan, E., Pauen, S. and Hoehl, S. (2021), Effects of Reinforcement Learning on Gaze Following of Gaze and Head Direction in Early Infancy: An Interactive Eye-Tracking Study. *Child Development*, 92: e364-e382. <https://doi.org/10.1111/cdev.13497>

Frank MC, Alcock KJ, Arias-Trejo N, et al. Quantifying Sources of Variability in Infancy Research Using the Infant-Directed-Speech Preference. *Advances in Methods and Practices in Psychological Science*. 2020;3(1):24-52. doi:10.1177/2515245919900809

Michel, C., Wronski, C., Pauen, S., Daum, M. M., & Hoehl, S. (2019). Infants' object processing is guided specifically by social cues. *Neuropsychologia*, 126, 54- 61. doi: <http://dx.doi.org/10.1016/j.neuropsychologia.2017.05.022>

Michel, C., Pauen, S., & Hoehl, S. (2017). Schematic eye-gaze cues influence infants' object encoding dependent on their contrast polarity. *Scientific Reports*, *7*(1), 7347. doi:10.1038/s41598-017-07445-9

Michel, C., Kaduk, K., Ní Choisdealbha, Á., & Reid, V. M. (2017). Event-related potentials discriminate familiar and unusual goal outcomes in 5-month-olds and adults. *Developmental Psychology*, *53*(10), 1833–1843. <https://doi.org/10.1037/dev0000376>

Michel, C., Stets, M., Parise, E., Reid, V.M., Striano, T., & Hoehl, S. (2015). Theta- and alpha-band EEG activity in response to eye gaze cues in early infancy. *NeuroImage*, *118*, 576-583. doi: <http://dx.doi.org/10.1016/j.neuroimage.2015.06.042>

Hoehl, S., Michel, C., Reid, V. M., Parise, E., & Striano, T. (2014). Live social interaction influences infants' oscillatory brain activity. *Social Neuroscience*, *9*(3), 300-308. doi: 10.1080/17470919.2014.884982

Michel, C., Hoehl, S., & Striano, T. (2014). The Influence of Familiarity on Explicit Eye Gaze Judgment in Preschoolers. *European Journal of Developmental Psychology*, *11*(3), 344-355 doi: 10.1080/17405629.2013.832670

Wahl, S., Michel, C., Pauen, S., & Hoehl, S. (2013). Head and eye movements affect object processing in 4-month-old infants more than an artificial orientation cue. *British Journal of Developmental Psychology*, *31*(2), 212-230. doi: 10.1111/bjdp.12001

Hoehl, S., Wahl, S., Michel, C., & Striano, T. (2012). Effects of eye gaze cues provided by the caregiver compared to a stranger on infants' object processing. *Developmental Cognitive Neuroscience*, *2*(1), 81-89. doi: 10.1016/j.dcn.2011.07.015

Buchkapitel

Michel, C.: Von Rasseln und Rätselkisten - Soziales Lernen als Schlüssel zum Menschsein. In: Menschsein. Die Anfänge unserer Kultur, S. 93 - 100 (Hg. Giemsch, L., Haidle, M. N.). Nünnerich-Asmus Verlag & Media GmbH, Oppenheim am Rhein (2021)

Hoehl, S., Michel, C.: Der lange Weg zum ersten Satz: Sprachentwicklung in den ersten Lebensjahren. In: Sprache, Kommunikation und Musik: Aktuelle Beiträge zur Diagnostik und Therapie, S. 19 - 30 (Hg. Mall, V.; Voigt, F.; Jung, N. H.). Schmidt Römhild, Lübeck (2018)
